

ClearShield Compatibility

CLEARSHIELD

	Brush	Roll	Spray	Liquid
ClearShield Select Made with the latest advancements in water-based coating technology, ClearShield Select offers superior UV protection, chemical and abrasion resistance. It is intended to be applied with a roller or spray equipment on a wide range of digitally printed products including pressure sensitive vinyl, banners and rigid substrates.				
ClearShield Select for StarLam Made with the latest advancements in water-based coating technology, ClearShield Select for StarLam offers superior UV protection, chemical and abrasion resistance. It is specifically formulated to be used with roll to roll liquid laminators like the StarLam 1600R on a wide range of digital printed products including pressure sensitive vinyl, banners and fleet graphics. Liquid laminators are an efficient, cost effective way to protect your digital prints.				
ClearShield Wall Armor ClearShield Wall Armor is Type II Certified and specifically formulated for wall covering applications. It is compatible with latex, eco-solvent and UV inks and is scratch and stain resistant. It can be applied by hand in a brush or roll application, by automated spray equipment or with a liquid laminator such as the StarLam 1600R.				
ClearShield Canvas Guard ClearShield Canvas Guard is specifically formulated for use over water-resistant canvas and Gicleé applications. It is highly flexible allowing the user to stretch the canvas after coating. ClearShield Canvas Guard is the ultimate protection for canvas.				
ClearShield Professional Transit ClearShield Professional Transit is intended for the most demanding applications. This two-part system provides the ultimate scratch and abrasion resistance. Ideal for truck tarpaulins and inflatables.
